EDUCATION

MIT SLOAN SCHOOL OF MANAGEMENT Cambridge, MA
Candidate for MBA, May 2027 2025 - Present
- Clubs/Leadership: VP of Product, Tech and AI Conference; VP of Community; VP of Product Management Club

RUTGERS UNIVERSITY New Brunswick, NJ
Double Major: BS in Computer Science and BA in Economics, Awarded Honors Program Scholarship 2017 - 2021
- Relevant Coursework: Algorithms, Computer Architecture, Databases, Financial Economics, Economic Forecasting

EXPERIENCE

WADANOVA Palo Alto, CA
Founding Product, GTM and Engineering Intern August 2026 – Present
- Owned product development for a pre-seed Employer of Record platform, translating customer insights into product requirements and shipping end-to-end workflows across international hiring, onboarding, and payroll
- Drove early-stage growth strategy by segmenting target customers, analyzing employer pain points, and testing product positioning and acquisition hypotheses to inform product roadmap and GTM priorities
- Developed GTM strategy by identifying target customer segments, mapping employer pain points, and conducting A/B testing across messaging and positioning to translate market feedback into product priorities

IBM San Jose, CA
Technical Product Management MBA Intern Summer 2026
- Developed a Python-based agentic AI solution for the IBM zAIOps team that integrated revenue, new emerging markets and customer data with analytics dashboards to generate real-time insights for competitive analysis and market research
- Developed automated data-processing and reporting workflows in Python and SQL to identify high-potential expansion markets and generate lookalike B2B customer segments, contributing to $100K+ in incremental sales opportunities

DELOITTE (2021 – 2025) New York, NY
Solutions Engineering Senior Consultant (Product Manager/SWE) 2024 – 2025
- Led technical evaluation and vendor selection for Motorola APX NEXT radios by defining operational, security, and feature requirements and conducting market and competitive analyses, resulting in a $21M nationwide procurement of 2,200 devices
- Authored a Rough Order of Magnitude (ROM) estimate and investment roadmap covering implementation scope, technical dependencies, expected ROI, and enhancement priorities, securing $2M in follow-on funding

Solutions Engineering Consultant 2022 – 2023
- Led product discovery across 9 hospitals, analyzing clinical workflows and translating findings into PRDs, user stories, product requirements, and a prioritized backlog for a statewide EHR platform
- Developed a 30-page technical recommendations report defining target-state workflows, functional and UI/UX requirements, data and integration considerations, implementation risks, and a phased pilot roadmap for statewide EHR deployment

Solutions Engineering Analyst (Product Manager) 2021 – 2022
- Owned end-to-end delivery of 6 cloud product migrations to AWS, coordinating engineering, data, security, testing, and production releases to reduce infrastructure costs 40% and improve processing speed 50%
- Drove agile delivery for a 10-person engineering team by managing user stories, technical dependencies, sprint priorities, environment refreshes, patches, and production releases

Firm Development: DEI and Pro Bono 2021 – 2025
- Led a 6-person team to standardize Salesforce and Google Sheets donor data, segment donors by giving behavior, and build Tableau dashboards that informed targeted bilingual email and SMS campaigns, increasing donations by 200% and funding 2 new women's economic empowerment programs

ADDITIONAL INFORMATION

- **Languages**: English, Spanish, Hindi, German, Urdu
- **Skills**: SQL, AI/ML Infrastrucure, Statistical Analysis (Python, R), Cloud Platforms (AWS, Azure), Claude Code, SaaS
- **Personal Project:** Developed real-life Mario-Kart that responded to items on a user-defined track; created using Kobuki, WiiMote, and Beaglebone Black
- **Government Clearance:** Secret Clearance with DOD, Public Trust Clearance with IRS
- **Interests**: Coffee, Travel, Piano, Skiing
